

TOYOTA

VERSO

GET READY FOR THE *new generation*

Experience the Verso. It's the ideal family vehicle, combining impeccable styling and indulgent luxury with smart practicality. Exhilarating performance is balanced by advanced safety features. All models utilise Toyota Optimal Drive technology to deliver more performance with lower fuel consumption and fewer emissions. The 1.8 TX CVT drives like an automatic which results in a significantly quieter drive. It also has the option of manually changing gears using the gear shift paddles mounted behind the steering wheel. The Verso says as much about your vision for the future as it does about your passion for living in the moment.

style REFLECTS STATUS

The Verso tackles the job of being a MPV (multi-purpose vehicle) with a sleek, energetic style that looks just as good going to the game as going to the office – a true multi-tasker, just like you.

All Verso models feature a front and rear spoiler that, although understated, enhances the aerodynamic characteristics of the vehicle when in motion. Colour-coded exterior finishes add to its sophisticated look, while a long wheelbase within its compact body, 16" alloy wheels* as well as front and rear fog lamps add to the Verso models' sporty edge. The Verso also comes equipped with a reverse camera* to help you better manoeuvre in tight spots.

Tie a Windsor knot

Conversation mirror* (above rear view mirror)

quality time STARTS INSIDE

Family time means "car time" – getting to those places and moments that make for great memories. So the Verso is engineered and refined to make every moment spent on the road more comfortable and relaxing. The seat design offers thicker cushioning and increased seat back shoulder length.

Among the host of details Verso has covered to make "car time" ultra-comfy and enjoyable are the following:

- Conversation mirror* for easy chatting with rear seat passengers (and keeping an eye on the kids).
- Cruise control* to make long distance driving less demanding.
- Air conditioner and automatic air conditioner**.
- Display audio with Bluetooth and 6 speakers*. You can also call the tune by plugging your portable music player into the audio jack and USB port (all models).
- Display, audio and telephone steering wheel switches*.
- The glove box has a lamp, while cup holders front and back mean there's no need for spills.
- Second row passengers stay cool and comfortable with sun shades** on the windows and a centre armrest.
- Electrochromatic rear view mirror**.
- Headlamp leveling system (all models) improves visibility.
- For added security and convenience, the TX models also feature Smart Entry** and Push Start System**, while speed auto door locks and double locking on all models keep everyone securely in the vehicle.

Passenger under-seat tray*

Under-floor storage box (second row)

Aviation table* (behind driver and front passenger seat)

Up to 7 airbags standard*

EVEN MORE *accommodating*

From sports equipment to school bags to groceries to luggage, it can be hard to travel light when you're travelling together. Happily, your Verso has room to spare.

The Easy Flat-7 system means just that – it's easy to fold the seats down flat to create a long, completely flat load area. The seats fold down easily without having to remove the head rests.

There's even an under-floor storage system which is perfect for putting bulky things in their place without taking up any legroom. For smaller bits and pieces, all front and rear doors have pockets, as do both front seats.

The Verso also keeps valuables out of sight with a retractable tonneau cover that can be used when the two seats in the third row are folded flat.

A SENSE OF *safety*

In the Verso, safety is taken to a new level. Verso models' world class passive and active safety features are designed to protect you and your loved ones, while design and engineering refinements offer improved visibility and enhanced handling to minimise risk when in motion.

AIRBAGS

Seven airbags* are positioned around the cabin to cushion driver and passengers in the event of an impact. These include

intelligent dual stage front airbags which adjust deployment according to varying conditions. On the passenger side, there's a manual override switch for child safety. There are also driver and front passenger side airbags and a driver knee airbag, in addition to curtain shield airbags* that extend to the third row of seats. These reduce stress on the head and torso during a strong side impact. An additional safety feature is an automatic fuel cut-off activated by the airbag sensors to reduce fire risk.

MORE SAFETY FEATURES

For the littlest passengers, ISO-FIX rear seat anchors with top tethers keep baby seats securely in place. Further protection comes in the form of 3-point safety belts for all occupants, front seat belt pre-tensioners with force limiters and seven headrests.

ENHANCED CONTROL

Retaining control is the essence of driving safety. All Verso models have an Anti-lock Braking System (ABS), enhanced with Electronic Brake force Distribution (EBD) and Brake Assist System (BAS) for better control. Vehicle Stability Control (VSC) can be activated at the driver's discretion, in order to minimise understeer or oversteer (i.e. slipping at the front or rear) while cornering by applying differential braking force to individual wheels. Traction Control (TRC)* prevents wheel spin when starting or accelerating on slippery or loose surfaces. Hill-start Assist Control (HAC)* prevents rolling back when engaging gear on an uphill.
